'A book without an endband is like a gentleman without a tie.'

Spend an evening making models of historic endbands. We'll start with the basic wrapped core 'stuck-on' endband. Then we'll move on to explore numerous historical variations, ranging from the basic 'primary,' which serves as a foundation for plaited and braided endbands using thread and leather, to more modern single- and double-core variations. Our samples will be sewn on robust practice 'cards.'

Suggested for intermediate bookbinding students.

Sponsored by the Hand Bookbinders of California.
